

Geography Year 12	
Half term 1	<p>Changing places Perceptions of place over time and space. Case study of a local and distant place and how it is changing over time and space. Examination of the economic, social, environmental and political factors involved.</p> <p>Coastal systems and landscapes How the coast operates as a system. The balance of the coastal system and the role of deposition, erosion and energy sources within the system. Creation of landforms on a coastline. Role of geology in landform formation. Seal level change and associated impacts. Management of coastlines, the role of Shoreline Management Plans and Integrated Coastal Management Systems globally and in the UK.</p>
Half term 2	<p>Evaluation of mitigation, adaptation and resilience methods of coastal management.</p>
Half term 3	<p>Hazards Concepts of hazards, storm hazards, volcanic hazards, seismic hazards, Processes involved in causing tectonic and atmospheric hazards. Fires in nature. Impacts of hazards in a range of locations. Hazard mitigation and management.</p> <p>Contemporary urban environments Processes of urbanisation, urban forms and change. Urban climates, drainage, waste disposal and management. Impacts of urbanisation. Sustainable urban development.</p>
Half term 4	<p>Fr year 12 students</p> <p>Fieldwork investigation and coursework preparation.</p> <p>Hazards (continued)</p>
Half term 5	
Half term 6	<p>Regular preparation reading and detailed notes, and diagrams of processes and concepts for lessons is expected. In addition students will be set consolidation questions to check understanding. Case study reports are set regularly.</p> <p>In addition reading of a broadsheet newspaper, and awareness of geographical issues globally, nationally and locally is essential</p>
Independent study expectations	<p>...Able to critically examine a range of geographical issues nad how the human and physical environment interact. You will be able to carry out an enquiry, test hypotheses and use a range of statistical techniques to analyse data.</p> <p>You will be able to evaluate strategies to mitigate, adapt and develop resilience to global and local geographical issues.</p>
By the time you finish key stage 5 you'll be...
